Out of the night came the roar of an engine. I locked down State College Parkway, from my vantage point on the East side of the Creative Arts Building and saw a brown blur screaming toward the "T" at the street's end. It was about 7 p.m. on Tuesday, Sept. 30 and a pickup traveling apparently over 50 mph hit the curb, somehow managed to guide itself between two trees and came to rest in the grass on the north side of the perimeter road. By the time I reached the scene, the camper's two occupants were hurriedly unloading equipment from the rear of the camper in an attempt to locate some tools so they could begin repairs. They didn't realize, however, nothing short of a portable, fully-equipped garage could solve their problem.

When the truck hit the curb, both front wheels flew off along with the brake drums, which shattered upon impact. Brake shoes were laying at odd angles along the vehicle route and broken glass and twisted metal littered the lawn.

Still, attempts were made by the two persons to jack-up the front of the truck and somehow replace the shattered drums and flat tires.

While the scenario continued to unfold, I squeezed off a few frames of the damage.

Finally, the campus police arrived and instead of apprehending the two persons involved in the accident, one officer started questioning me about who I worked for and informed me that pictures of the occupants and the vehicle could not be published.
OFF THE WALL

Anti-Nuke the Foo-Birds Movement

A new campus organization has been created to support a move on the part of anti-nuclearists to gain military backing for the movement. This has become a part of an ongoing effort to remove nuclear weapons and associated threats. Such an action is inconsistent with the historical record of such moves.

What would the world be like without the Foo-Birds? Continuation of their philosophical evaluation of human beings.

Besides, the EPA would frown on the use of Nukes and the paperwork generated would cause a great deal of work that could be eliminated by simply swallowing one's own mistakes and wiping off what the Foo-Birds leave.

Penguins in Bondage

Reports have reached the PawPrint concerning an insidious fascist, vindictive Russian Plot to enslave and manipulate the important Emperor Penguin into weapons of destruction.

By JACK ANDERSON

WASHINGTON - The power of the presidency is the most potent force in American politics today. Here is how Jimmy Carter used this power a few days ago.

The Senate was about to reject the president's appeal to let his son visit India. This would have been a personal defeat on the eve of the election and would have made him look bad.

The Senate was about to reject the president’s appeal to let his son visit India. This would have been a personal defeat on the eve of the election and would have made him look bad.

So the president took a few minutes from his campaign to telephone several senators from aboard Air Force One. It was impressive to get a call from the president of the United States from on high. It was also good to talk back to him.

Then Carter ordered the big guns in his administration to bombard Capitol Hill.

The most effective were Secretaries of State Edmund Muskie and Secretary of Defense Harold Brown. They turned on the press behind the scenes.

Muskie got the credit for swaying the vote of Sen. Robert Stafford, R-Vt. Brown maneuvered a 10th-hour appeal won over Sen. John Stennis, D-Miss., the Senate Armed Services Committee chairman.

The president also backed home the official release of former ambassador William Goheen from India. He used to be president of Princeton University, where Sen. Bill Bradley, D-N.J., is an alumnus.

Anti-Nuke experiments with Dolphins and Porpoises in the Soviet launching and research project in the Antarctic during the recent Aufrial Summer to teach the Emporer Penguin, four feet of natural opacity, to perform various espionage and raiding functions in the Antarctic, The Soviets have been reported manipulating the polar weather with bombs of food, indicating that the Soviet Bloc has attempted to alter the生病 into submission for the North.

The U.S. Navy is reportedly annoyed at the maneuver because they did not think of it at all. Despite the many years in the Antarctic, the Soviet bloc seems to be coming from the West.

However, the worst threat to the Soviet seems to be coming from the West. The Soviet bloc seems to be coming from the West, from their contacts throughout the world which have been set up by the world.

Very rarely has this organization fulfilled its full strength to deal with problems linked to their interests. However, when it has the effect has been momentous.

It appears that another major crisis will appear in the world in the next few months. The world is presenting a dangerous escalationary potential that threatens the world security.

THE REAGAN RECORD

President Reagan’s enemies have insisted that the president’s appeal to let his son visit India. This would have been a personal defeat on the eve of the election and would have made him look bad.

But Ghotbzadeh’s enemies gleefully insisted that the president has refused to allow his son to visit India. They turned on the press behind the scenes.

CSUC Saves Energy Costs Still Soar

LONG BEACH -- Stringent conservation efforts by The California State University and Colleges resulted in a 16.7 percent energy consumption decrease in 1979-80, newly compiled figures showed today.

Chancellor Glen S. Dumke said the energy cutback far exceeds a goal of 10 percent set for 1979-80.

The long-term objective for the 19 campuses is a 40 percent drop in energy consumption, with one of the key reductions being the replacement of incandescent light bulbs with energy efficient fluorescent tubes. This was virtually completed in 1979-80.

This program, coupled with other projects such as installing rigid thermostat controls, timed heating schedules for buildings such as dormitories and classrooms, and switching to computer technology in the education process, was cited by S. Choudhuri, CSUC Energy Management Engineer, said a major program to replace about 750,000 standard 40-watt fluorescent lamps with 35-watt energy efficient tubes was virtually completed in 1979-80.

This program, coupled with other projects such as installing rigid thermostat controls, timed heating schedules for buildings such as dormitories and classrooms, and switching to computer technology in the education process, was cited by S. Choudhuri, CSUC Energy Management Engineer, said a major program to replace about 750,000 standard 40-watt fluorescent lamps with 35-watt energy efficient tubes was virtually completed in 1979-80.

In addition to the energy conservation efforts, the California State University and Colleges have entered into a contractual arrangement with Control Data Corporation for what is believed to be the largest computer installation for instruction and administration ever undertaken by an academic institution.

The project will require two years to complete and will significantly increase the level of sophistication and the role of computer technology in the education process.

We project the number of students using computers, about 74,000 in 1976-77, will increase to 166,000 in 1981-82. Putting it another way, at least one out of every two of our students will be using computers for instructional purposes, according to our most conservative estimates.

Modemizing our computing resources will have a positive effect on the approaches to learning within The California State University and Colleges Computing, which for several years has been a resource tool for courses in the physical sciences, including computer science and engineering.

The bishop, who is among the most important in instructional programs in business, management, agriculture and the social sciences, is being used in such curricula as commercial art, architecture -- even philosophy, when the project is completed the number of terminals for student access to computers will be increased from 1,751 to 2,747.

New Computer System For CSUC

The Counseling Center will be offering a group to help students overcome shyness. The group will focus on the practical question of how to cope with challenges posed by shyness. You'll find constructive ways to change how you think about shyness, and how you think about yourself. Often shyness is not caused by a lack of self-confidence or unfounded fears about social situations; it may be a matter of not having or practicing certain social skills.

In the group, a change in how you think about shyness, and how you think about yourself. Often shyness is not caused by a lack of self-confidence or unfounded fears about social situations; it may be a matter of not having or practicing certain social skills.

The group meetings will be on Tuesdays and Thursdays, starting October 14th. If you're interested in participating, call or drop by the Counseling Center, 2201 West 88th Street, for an appointment.

Bishop Straling To Speak Here

The Most Rev. Philip F. Straling, bishop of the Roman Catholic Diocese of San Bernardino, will speak here Wednesday noon, Oct. 8.

The Most Rev. Philip F. Straling, bishop of the Roman Catholic Diocese of San Bernardino, will speak here Wednesday noon, Oct. 8.

The. Bishop, a former member of the Student Union Building advisory committee of the Associated Students at Cal State, was visiting here to talk about the work of the Catholic Church in the area. Bishop Straling is expected to discuss the work of the Catholic Church in the area. Bishop Straling is expected to discuss the work of the Catholic Church in the area.

Prof Honored By League Of Women Voters

Dr. Carol F. Goss, an associate professor of political science and an 85-year-old Redlands High School graduate, has recently been named as one of 20 "Citizens of Achievement" by the League of Women Voters.

Dr. Goss has been a professor at Cal State since 1971 and has been active in the Redlands League of Women Voters and the National Catholic Education Association.

The San Bernardino league chapter is currently celebrating its 25th anniversary.
Cattle Step Up College FTE Drive

Three prospective students were spotted on campus last Friday night by the Mid-Watch in the Pub.

The entire campus community sprang into action in an effort to increase the FTE and enrollment figures.

Admissions, and Records officials immediately rushed to the scene to enroll the cattle. However, the cattle did not have the required application fee so A&R turned the matter over to Financial Aids who were arguing with the Placement Office Personnel whether the new students would be on Work Study or employed as Student Assistants. Work Study won out temporarily when it was found that one of the cattle had a BA and would be considered a graduate student and thereby unenrollable on the campus since they require higher wages.

Financial Aids prepared a fee waiver only to discover the required signatures could not be taken.

EOP heard of an entire family planning to enroll from an obscure minority and rushed to the scene only to leave upon discovering the Family came from Guernsey.

Dorm officials expressed relief that they wouldn't have to find room in an already overcrowded dormitory. Signs of relief were also reported from the Dorm Maintenance and Cleaning Staffs.

Several groundskeepers were seen to wipe their foreheads in relief.

The Physical Plant did send a representative to require a mandatory EPA study be launched to determine the ecological impact in terms of waste disposal parameters operating within the ground water system.

AS Government officials ran to the scene and gave out gift packs and calendars.

Campus Police attempted to arrest the family for trespass, but the bull, who had graduated from Hastings College and the Police decided his points were better than theirs. They then attempted to issue a parking citation but had to give that up also when they could not find a windshield wiper.

The HoofPrint interviewed the cattle and discovered they were on their way North to Stanford's Research Farm to visit relatives and apply for their writing fellowship.

Quality Homes For A Quality Life

Children's Home Society of California has recently been awarded a grant to recruit and certify 12 homes for Developmentally Disabled children. The purpose of the Grant is to assist in the development of homes which could provide a normalizing experience for developmentally disabled children with special needs and who have no other alternative than State hospitalization.

Children's Home Society is looking for people who have experience, training, or are willing to receive training, which would provide them with the necessary skills to meet the needs of children with autism, multiple handicaps, and behavioral adjustment problems.

Children's Home Society is authorized to certify foster homes for children (0-21). The certification would be equivalent to a license entitling the foster home to become vendicated.

Financial assistance is available through the grant to assist potential foster homes meeting specific licensing requirements.

Children's Home Society is working in cooperation with ICDDS staff to fulfill the objective of the grant. For more information please feel free to contact us at (714) 686-7603.
The team of Denise Gojerola and Mark Littlefield take off from the start/finish line.

Two of the three arms (top) belong to Julie Hoover as a competitor passes her canoe in the head-to-head competition. During a lull in the action, a student catches up on some reading (right).

The First Annual Budweiser Intramural Canoe Races were held at Glen Helen Park, on Friday, Oct. 3, with the team of Karen Kersey and Rob Wilson capturing first place with a time of 2:01.

Sherry Kiefer and Jerry Fay took second (2:11) and the team of Evelyn Garcia and Scott Burnett were a close third (2:12).

According to Joe Long, the campus intramural director, 16 teams participated in the event.
A Smithsonian Institution exhibition focusing on black women who have contributed to the development of this country will be displayed in the Library until Nov. 2.

Titled 'Black Women: Achievements Against the Odds,' the exhibit illustrates achievements and contributions of both known personalities and little recognized black women. It was researched and developed by the Anacostia Neighborhood Museum of the Smithsonian Institution.

Included in the show are women such as Maggie Lena Walker, the first black to serve as president of a United States bank; Nikki Giovanni, writer of poetry and nonfiction; and Billie Holiday, noted blues singer.

Library Exhibit Feature On Black Women

Everyone brought their frisbee, hamburger, steak and beer for a fun filled day of reminiscing about the "good-old-days" and updating each other on the events which had transpired during the past several years.

There were many photograph collections which brought back vivid memories to all of us. We laughed with amazement at some of the stories behind the pictures. Those who had married and begun to raise a family were especially surprised with the changes in their life styles.

Kevin Shaunessy, who was one of the Village's first residents, related how he had trained to be a firefighter while in pursuit of his B.A. at CSCSB. He presently lives with his wife in El Cajon and is employed with the fire department in San Diego. Of his experiences as a firefighter, Kevin recalled: "My biggest fire occurred when our truck was first at the scene of a huge fire involving a jet airliner a few years ago."

The credit for the planning and organization of this festivity belongs to Cheryl and Pam Robson both former residents of Shandon. Cheryl, who was the house resource (RA) person in Shandon during her last two years (1975 and 1976 academic school years), said that even though only about half of those invited came, the event was a huge success and that once other people heard about the reunion they would be eager to attend the second annual reunion next year.

I'm anxious to look into the possibility of having someone (perhaps myself) coordinate his/her efforts with Cheryl to invite those residents from the Village who had attended the reunion in 1977 through the 1980 academic school years to the reunion because this is an excellent and convenient means of restoring and/or maintaining interpersonal relationships.

English Equivalency Exam

A chance to lead.

A chance to fly.

These and many more opportunities for personal growth are available through training programs in the United States Army. Officer Candidate School (OCS) and the Warrant Officer Flight Training (WQFT) programs train leaders and pilots for assignments all over the world.

To enter OCS you must have a bachelor's degree and meet other qualifications. WQFT applicants must possess a high school diploma. A couple of years of college are desired but not mandatory.

I have been appointed College Recruiter for this area. I will be working closely with local Army Recruiting Stations to help college students plan for their futures in the Army.

I look forward to talking with you about the Army and your opportunities. Please call for an appointment.

884-6600

Sgt 1st Class Herbert Herod

THIS IS THE ARMY
How to avoid pulling an all-nighter over your checkbook.

With Bank of America, you won’t have to stay up nights worrying about your checking account. We offer several checking plans and a variety of banking services that make checking easier.

Check into our checking plans.

Select Checking is economical if you only write a few checks each month. With the Option Plan, the higher your balance, the less you pay in service charges. And with InitialLine Checking* if you qualify, you get a line of credit with your checking account. And a way to qualify faster for a BankAmericard Visa credit card.

Study our services.

Our Money Convenience System includes: Monthly Timesaver Statements—an easy way to help balance your checkbook. Money Transfer Service—great if you’re getting money from home. Extended banking hours at many of our branches. Free Consumer Information Reports—on everything from checkbook balancing to ways to finance your college education.

Rest easy.

We have people ready to help with your banking needs. Come on over. Find out more about checking or any other banking problem that’s been keeping you up late.

*If you’re a full-time student of sophomore standing or higher attending college in California, you may qualify for InitialLine Checking. Freshmen may qualify in some cases. See us for details.

BANK OF AMERICA

Bank of America N.A. • Member FDIC

This Week’s Intramural Schedule

| Monday, Oct. 6 | Flag Football Officials Meeting 3:00 p.m. P.E. 122 |
| Tuesday, Oct. 7 | Flag Football Officials Meeting 3:00 p.m. P.E. 122 |
| Wednesday, Oct. 8 | Entry deadline & meeting for co-ed…3:00 p.m. P.E. 122 |
| Friday, Oct. 10 | Entry deadline & meeting for men…4:00 p.m. P.E. 122 |
| Friday, Oct. 10 | Entry deadline & meeting for women…12:00 noon P.E. 122 |
| Co-ed Flag Football…2:00 pm fields |
| Men’s Flag Football…3:30 pm fields |
| Monday, Oct. 11 | Entry deadline & meeting for men…12:00 noon P.E. 122 |
| Monday, Oct. 11 | Entry deadline & meeting for women…3:00 p.m. fields |

Intramural office hours 10:00 a.m. - 12:30 p.m. Monday, Tuesday and Wednesday.
Budweiser TASTEBUDS

OH NO! HE'S EATING AT HIS FOLKS' PLACE TONIGHT!

REMEMBER YOUR MANNERS!

DON'T PLAY WITH YOUR FOOD!

EAT ALL YOUR VEGETABLES OR NO DESSERT!

WHY DOES HIS MOTHER WAIT TILL HE'S COMING TO DINNER TO TRY ALL THESE WEIRD "101 WAYS WITH LIVER" RECIPES?

HANG IN THERE GUYS.... MOM JUST SAID THERE'S APPLE PIE NEXT!

AND POP JUST ASKED HIM IF HE'D LIKE A......

GOOD OL' POP! HE ALWAYS DID HAVE TASTE!

CLIC! THINK IT'S HEREDITARY?

WHY DO YOU THINK THEY CALL 'EM TASTEBUDS ANYWAY!

YEA!! FAR OUT!!!!
