**MAJOR OUTDOOR SCULPTURE EXHIBIT OPENS ON CAMPUS**

A major outdoor sculpture exhibit, featuring works by artists of international reputation is being assembled for display from April through June.

The exhibit will contain 15 works comprised of a variety of media: resin, steel, bronze, wood and enamel. They are being located on the grounds around the Fine Arts Building and the mall and vary in size from a few feet to ten feet high. They are breath-taking in scope and design.

According to Poppy Solomon, Gallery Director, this is the first time a major outdoor show of this proportion has been presented at the College and in this area.

The College has been treated to a preview of some of the early arrivals as they were placed in their display locations. The first, the object of much interest, was "Western Gate Ripple" by George Herms, assembled in the fountain by the Ad-

ministration Building. Other early arrivals were "Dionyslous" by Gloria Kisch, located atop the grassy knoll east of the Administration Building, and "Poppyfield" by Jim Croak, on the grounds east of the Fine Arts Building.

Exciting pieces continue to arrive and by opening date, April 5, the entire collection will be ready for view. Other artists who will be in the display are George Rickey and Jack Zajack, both internationally known sculptors whose work is featured in galleries throughout the world; Dimitri Hadzi, Jud Fine, Jene Flores and Aldo Casanova, all Southern California artists.

Roger Lintault, Professor of Art and well-known sculptor, will also display a work in the exhibit.

An informal discussion by some of the artists will open the exhibit Thursday, April 5. The symposium, also featuring an art critic and part-time writer for the LA Times, will begin at 4 p.m. in the Gallery of the Fine Arts Building. It is open to all at no charge.

PUBLIC AGENCY MATERIAL The College is in the process of establishing a unique library of publications prepared by neighboring public service agencies. No central point existed previously for the exchange of such materials. Policy manuals, budgets, personnel policies, handbooks, procedural manuals and other printed materials relating to the operation of such agencies will be incorporated in the collection.

Material is being gathered from agencies such as water, school, air pollution control districts, counties and cities in San Bernardino and Riverside counties.

The special collection will be used by students studying public administration and by the agencies themselves as a central point for exchange of information. The project is being initiated jointly by Library Director Art Nelson and Margaret Gibbs, Assoc. Prof., Public Administration, who presented the request for the material at a meeting of urban managers of both counties last month.

CRIME TIP Good neighbors are one of the best deterrents to crime. Know your neighbors and join together to keep watch on your neighborhood. Keep your eyes open. Write down descriptions of suspicious persons and license numbers of suspicious vehicles; then call the police. That's what they're there for.

Sympathy-The College extends sympathy to Judith Rymer (Education) on the death of her father, Dr. F. Norwood Marquis on March 13. Dr. Marquis, a retired dean of education at Wright State University in Ohio, supervised student teachers for Cal State part-time during his retirement. He became ill about three weeks ago. In addition to Dr. Rymer, he is survived by his widow and a brother.

Funeral services are Saturday at 2 p.m. in the United Methodist Church of Yucaipa. In lieu of flowers the family requests that contributions be made in memory of Dr. Marquis to the United Methodist Church or the American Cancer Society.

ADDITIONAL $34,000 RECEIVED FOR DAIRY WASTE RESEARCH PROJECT

Amer El-Ahraf, Chairman, Dept. of Health Sciences and Leonard Farwell, Foundation Manager, were notified by the Chino Basin Metropolitan Water District (CBMWD) that an extension grant of $34,000 has been approved for the College. This brings total funds committed to the dairy waste research project directed by Dr. El-Ahraf to $97,858.

The project, which is supported by CBMWD, Environmental Protection Agency and the State Water Quality Control Board, aims at improving water quality in the region while using recycled dairy manure in a healthful and safe manner.
