State deficit causes tuition increase

Karla Buchanan
News Editor

California’s $35 billion deficit has prompted several repercussions throughout the state. One of them includes a $326 million cut in the California State University system’s budget. While the system is trying to soften the effects for students, this remains to be seen.

One of the most noticeable issues for students will be fee increases, which was decided on by the Cal State Board of Trustees. The fee increase became effective with the winter 2003 quarter.

Increases will equal 19% for undergraduates and 15% for graduate students. This will amount to an increase of $28 for undergraduates with 0-6 units, $48 for undergraduates with 6.1-11 units, $44 for graduate students, carry 0.6 units and $76 for graduate students carry 6.1+ units.

According to Seryl Pylik, CSU San Bernardino Director of Accounting, students who receive financial aid will have their fee increase paid automatically from their allotment while students who pay their tuition will be receiving a bill in about two weeks, after the dropping/adding period is over. Students who do not receive financial aid will have until their next registration date to pay the increase; otherwise they will have a hold put on their records, preventing further registration.

While most students and faculty understand the fee increase, the timing of the increase is under scrutiny. A special session of the Board of Trustees was called to make the final decision on fee increase on Dec. 16, 2002.

By the time the resolution presented to the Board of Trustees hits the feeling of the student population, was not notified until a week before. Additionally, the decision was made at a time when students were concentrating on finals.

"We cannot effectively communicate with the students the system serves within the period of one week, especially a week where a large number of students are in finals or enjoying a break in classes.

The date for the special session is dubious at best, as are the numerous statements of the past month reassuring students that fees would not be increased," states CSUSB ASI President Erin Falls in a letter accompanying a resolution presented to the Board of Trustees.

ASI representatives presented the resolution opposing the fee increase, its timing, and challenging the Board’s previous position that fee increases would not occur. While the Board accepted the resolution, the fee increase proceeded as planned.

However, even with these fee increases, CSUSB students still pay significantly less than students from other universities. In a press release by CSUSB President Albert Karrig, Cal State students will still pay only an average of $2,000 per year, the lowest among the 15 comparable universities in the California Postsecondary Education Commission (CASEC).

Other areas of the CSU budget that will be affected in a reduction in academic and institutional support, student services, outreach funding and public service programs. CalTech recruitment programs and bilingual teacher recruitment programs will be eliminated.

Renowned philosopher at CSUSB

By Jenn Gardner
Asst. News Editor

"Is evolution incompatible with design?" This was one question to be philosophized over on Jan. 16 at the first of Dr. Alvin Plantinga’s two lectures at Cal State University, San Bernardino.

To give this topic a strong background, Dr. Plantinga discussed six theses including Darwinism and the distinctions between variations of the Design Thesis.

Dr. Plantinga has held the high honor of the Rev. James A. O’Brien Chair of Philosophy at the University of Notre Dame for 21 years. He has had over twelve books and over 100 articles and papers published. God, Freedom, and Evil was one of these published books. Reviewers have claimed that Dr. Plantinga has "spawned a rebirth" of the philosophy of religion. Design was not a factor, it seems, in Dr. Plantinga’s lectures at CSUSB.

In the first session, Dr. Plantinga presented his lecture on "Evolution and Design" in the Visual Arts building to a crowd of 107 attendees. Dr. Plantinga led his audience through three main topics during this lecture. He discussed the compatibility of evolution theories and the theories of design; Evolutionary Psychology or, as coined by E.O. Wilson, Socio-Biology and design; and, whether or not science is a ‘defeater’ of Christian theism.

A portion of his lecture was -Philosopher continued on page 14

Open University program lets students in

By Vincent Dass  
Staff Writer

Open University permits any student to enroll no matter what. It is designed for students not admitted to the University, but who wish to take classes at Cal State San Bernardino without going through the application process.

This program is designed for those who missed the deadline for admission to the regular resident program, who want to examine a particular field before actually enrolling in a degree program, who want to update professional training, or who is considering to re-enter an academic program, or who wants to take courses not offered through Extended Learning.

Open University can help people update their professional skills, prepare for a career change, enrich personal development or work toward a degree.

Many of the regular courses are held in the late afternoon and evening, which opens up opportunities for working adults. Open University makes it possible for community to take courses from the regular campus offering without going through the formal admission process, providing they have the necessary prerequisites for the courses chosen.

Students will be accepted in Open University classes on a space-available basis. Enrollments will be considered conditional until all regular students have had an opportunity to enroll in that course. An individual who wants to be a full-time student should apply for admission to the University as a matriculated student.

A maximum of 36 units earned through Open University can be accepted toward a baccalaureate degree; 13 Open University units can be accepted toward a master’s program. Almost all of the courses listed in the quarterly on-campus class schedule are open to both non-matriculated students. However, each student must have the necessary prerequisites or the consent of the instructor when required.

Students can satisfy residency requirements and receive Special Sessions Credit for courses taken through Open University. For a complete list of courses that require authorization from the CSUSB Advising Center prior to registration consult the CSUSB Class Schedule, which is available at the campus bookstore.

Only Open University applications may be used to enroll in the Open University Program; University Add/Drop slips are not accepted. The fee of $120 will be charge per credit unit. Additional fees may be charged for courses that offer laboratory work or individual tutorial instruction.

On the first day of classes, Open University applications will be issued. No fees will be accepted at this time. First day payment will be accepted along with instructor-signed application return, to the College of Extended Learning (Sierra Hall 134) to register for courses.

The student is not enrolled until the office has received a signed application and applicable fees have been paid. Fees may be paid by cash (exact change only), check, money order, or by Visa or MasterCard-Final day to pay fees and register without incurring $25 late fee.

Students wishing to pay by invoice must present completed paperwork when registering.

Unregistered students will not be able to register after this date. Under certain circumstances, financial assistance may be available to some students. Depending on certain circumstances a student may be able to get veterans benefits.

---

State Superintendent of Public Instruction visits CSUSB campus

Jake Zylman  
Executive Editor

Cal State San Bernardino opened its doors to an inaugural party for State Superintendent of Public Instruction Jack O’Connell on January 16. Although inheriting the office on the brink of troubling economic times that threaten funding for many educational programs throughout the state, O’Connell is strong in his belief that every student will be able to attain a quality education.

Described as “one of our own” in an introductory speech, O’Connell, largely comprised of prominent educators in the area, O’Connell received many ovations for his insightful speech that includes class reduction in secondary school and building more educational facilities.

The event, according to O’Connell, was a “momentum we have created in the community.” The event was one of five of its kind scheduled in the state.

The Buzz

Blood Needed!

There will be blood drives on Jan. 24 and Feb. 6 from 11:00 a.m. to 4:00 p.m. in the lower commons.

Faculty Needed

The Faculty Senate Executive Committee will be nominating a faculty representative to serve on a special committee that President Kang is forming to consider whether current University charge-back policies are having an adverse effect on the University by discouraging academic departments and student organizations from holding events on campus. If you have interested in being a faculty representative, please contact Ted Bund at ext. 5292 or ext 5886.

CSUSB Scholarship Application

The deadline to file a CSUSB scholarship application is March 2, 2003. Students may apply online at: http://finaid.csusb.edu.

The 2003-2004 Free Application for Federal Student Aid (FAFSA) is due to CSUSB by Feb. 15, 2003. For more information, contact Roberta Albert at 880-5221.

Essay Contest

Students may enter an essay contest, “The Importance of Debate in a Democratic Society.” The essay should be from 500-1000 words. The winner will receive $1,000 at a dinner where they will read their essay. Send essays to: IEDS, 6395 Olive Avenue, San Bernardino, CA 92407 no later than January 31, 2003. For more information, call 887-4949.

In Need of Legal Advice?

By Shannon Burris  
Staff Writer

Cal State San Bernardino’s new Palm Desert campus recently received a tribute award of excellence. It was given to them by the Alumni Association with two additional awards. In regards to Grad Days 2002, the association praised Cal State in the Best Reach/Impact Program category and also Best Student Program in regards to the Coyote Pack.

Grad Days 2002 discounted merchandise in the bookstore: items such as caps, gowns, diploma frames and other Cal State goods. The award presented for the Coyote Pack program award is reflective of the increased interest and awareness of students and alumni. Social events, opening with the “House of Blue” followed by athletic contests and give-a-ways, helped to encourage participation and pride in the university.

Potatoes under fire

Research has suggested that certain foods are found to contain acrylamide; these foods are major contributors to many carcinogenic substances, according to Science News Online, is known to be "a neurotoxic and carcinogenic building block of Western diets" and has been cited as binding itself to the red blood cells of those whom have tested positive for the chemical.

Research on acrylamide began due to faulty repairing of a leaking railway tunnel in southern Sweden in 1997. A form of acrylamide was spilled through the damaged areas, instead of acting as a sealant, but remnants seeped into a nearby waterway killing the fish therein. Signs of effects, including paralysis, surfaced in cattle, which were concluded to have drank water from the polluted water. Out of caution the site marked by researchers Margareta Tomqvist and fellow colleagues at Stockholm University tested the workers for the poison who, along with non-site workers, tested positive for the poison.

Acrylamide was present in the process of burning tobacco, however, non-smokers were also found to have the chemical. This is what lead the researchers to explore other high-temperature processes, such as cooking, as possible sources of the chemical. Although all the research can be summarizing in symptoms, Michael F. Jacobson, the executive director of the Center for Science in the Public Interest, attempted to reassure dieters, "we would aim to cut down the most contaminated, least nutritious foods." The chart lists some of the foods tested for acrylamide.

- Potato (boiled or raw)
- Corn (tortilla, 12-13)
- Cheese (cheese, 30-49)
- Bread (13-150)
- Toast (light-dark, 50-100-280)
- Corn (corn, 120-300)
- Coffee (coffee, 200-700)
- Low-calorie crackers (20-200)
- Breakfast cereals (20-35)
- French fries (85-3,897)

Acrylamide measured in cooked/processed foods

Acrylamide has been cited as a "deadly weapon" that causes signs of effects, including paralysis, tingling fingers and toes - the classic symptoms of acrylamide neuropathy, in the Science News Online article (Aug. 24, 2002; Vol.162, No. 8).

For a full report of the research the Journal of Agricultural and Food Chemistry published the findings in the Aug. 14, 2002 issue.

POLICE REPORTS

Jan. 13

Incident: Battery, Mutual Combat
Description: At approximately 0013 hours, our Officers responded to Serrano Village Apartment #6 regarding a report of harassment phone calls. "An unknown female caller left voice messages threatening the female resident to a fight.
Disposition: Report taken, referred to Detective.

Jan. 15

Incident: Hate Incident
Description: Between 01/07/03 and 01/08/03, an unknown person drew a hate symbol on a picture of a staff member in the Parking Service's unit.
Disposition: Under investigation.

Jan. 16

Incident: Vehicle Burglary
Description: On 01/14/03, a student's vehicle was impounded from Lot A for unpaid registration fees. Between 01/14/03 and 01/15/03, an unknown person(s) entered the student's vehicle and stole the student's property, while it was under storage.
Disposition: Under investigation.

Jan. 16

Incident: Vandalism
Description: At approximately 0200 hours, our Officers responded to the PFAU Library regarding a report of vandalism to the men's restroom on the fifth floor. Unknown person(s) wrote on the walls.
Disposition: Report taken.

Jan. 16

Incident: Burglary
Description: At approximately 0325 hours, our Officers responded to Residential Housing building #6 regarding a report of a Burglary. Between 12-18-02 and 01-16-03 unknown person(s) stole a CD player.
Disposition: Report taken, under investigation.

Jan. 16

Incident: Warrant Arrest
Description: At approximately 1000 hours, our Officers served a felony arrest warrant to a location on campus regarding a fraud that had occurred on campus. The non-student female was arrested without incident and transported to County Jail for lodging.
Disposition: Report taken.

Jan. 16

Incident: Harassing Phone Calls
Description: At approximately 2020 hours, our Officers served a warrant for a minor injury. The resident could not be located.
Disposition: Referred to Detective.

Incident: Warrant Arrest
Description: At approximately 3050 hours, our Officers responded to Residential Housing building #6, and served an outstanding bail warrant to a female student, for narcotics violation. Student was transported to the San Bernardino Central Jail.
Disposition: Report taken.

**Martha Santana**

By Arianna Valdez
Staff Writer

Martha Santana is a prominent and committed community volunteer, helping others has been her drive for a long time.

Santana’s ability to help others has been influenced greatly by the organizations she is involved with. One of these organizations has been the Kappa Delta, which she claims, “broke me out of my shell,” and heightened her social skills, which have been an essential part of her growth.

Santana is also actively involved in the Inland Empire Future Leaders Program, which puts together a Latino-based camp in which eighth and ninth graders learn about many things including leadership skills, cultural awareness and self-pride for themselves. However, her commitments do not simply end there.

She dedicates her time in church as a youth minister and a confirmation teacher, helping the youth with their spirituality. With much experience she is also able to maintain a job as a student assistant at CSUSB. Clearly, Santana thrives on community service, and these achievements has been receiving the position of assistant director in the Future Leaders Program. This has been, noteworthy for her because she has been thoroughly involved in this program for eight years. She feels proud to be part of something that can make a difference in people’s lives.

Her top achievements, in her mind, are graduating from high school and college because no one in her family has been able to do that. She is the first in her household from both sides of her family to ever graduate from high school. Graduating from college will be an even greater feat that she does not take for granted.

Santana wants to continue helping others and with her degree she will be able to do that. After graduating she plans to teach fourth graders, and return to CSUSB to receive her masters in history and teach at the high school or college level.

Martha Santana, without a doubt is an exemplary and inspiring woman who selflessly embraces and even asserts. She says “If I could make a job of all my community services, I would do it.”

Zeta Phi Beta Steps to the beat

Sorority celebrates their heritage through step for their peers

By Lakesha Troupe
Staff Writer

The Yard Show has come and gone. On Wednesday, January 16, members of the Zeta Phi Beta Sorority came from various locations to put on an event in recognition of their founders day. Lynn, a member of the Zeta Phi Beta sorority, says, "I love my sorority sisters. They came all the way from Los Angeles to support us... We appreciate them. I think it was a success." Their fraternity brothers, Phi Beta Sigma Fraternity, worked together with them to make this special occasion a day to remember.

The ladies of Zeta Phi Beta perform at the SU courtyard. Also there to support them were members of the African American Alliance organization, members of other greek organizations, and also members, of the CSUSB student body.

The yard show was held at the Student Union courtyard at 12:30 p.m. Those who attended were able to enjoy refreshments. They also enjoyed fun filled entertainment that included a step show presentation presented by the Zeta Phi Beta Sorority and the Phi Beta Sigma Fraternity. They represented their organization well by strolling in their royal blue. These lovely ladies also gave the history of their organization which was founded by five women known as "The Five Pearls of Zeta. These women stood on four principles that include community service, finer womanhood, scholarship, and sisterly love. If you are a woman who exemplifies these principles and you are looking for an organization to share your positive attributes, look no further. Zeta Phi Beta Sorority Incorporated is an organization made up of women of excellence working together to become dedicated and focused individuals in society. This is the only sorority that is constitutionally bound to a fraternity, known as the Phi Beta Sigma Fraternity, and has an official partnership with the March of Dimes. Interested ladies may visit their website at PiZetaZeta.hypermart.net or email them at: (zetaladies005@yahoo.com)

The Zeta ladies gave the crowd a blastful event to remember. Grace German, a student saying, "A positive message was sent when African Americans and other ethnic groups can come together and participate in a positive event." This event was not only a day of recognition to the founders of the Zeta Phi Beta Sorority, but it was also an event that brought along unity. "I felt that this event promoted unity amongst the body at CSUSB.

Interracial dating: Are we as diverse as we think we are?

By Susie Medina
Multi-Cultural Editor

Interracial dating has been a subject for concern for over a century. Even now, when we believe removed that we are so far removed from racism, some people still feel dissapointed when thinking about interracial dating.

David Turner, who is black, dated a white girl in high school, who he described as being down to earth. “My mom was upset because she was white.” The relationship was short-lived and he claims that he would probably never date a white girl again.

With California being so diverse and Cal State San Bernardino being a representative of this, it seems surprising that there are not dated outside their race or even disproved of it.

Zack Horsey, a white, says he has never been in an interracial relationship but he does not have a problem with them. “The government does need to come up. I don’t have a preference when it comes to dating. I’d go for an interracial relationship.”

Horsey’s current girlfriend is white and she hasn’t been in an interracial relationship either, as far as he knows. He says he has “a couple friends” who are not white.

It is said that we are creatures of habit and the environments to which we are raised, will shape who we become. It is no wonder that many people, like Horsey, have not had an opportunity to date outside their race. Tony Glass, on the other hand, has had the opportunity to date a Hispanic girl. He is black. He has decided since, that he will only date black girls. He now states “I don’t approve of interracial dating.”

But the subject of interracial dating is not all negative. There is a lighter, more fun side to it. Chris Maida, who is half-Korean and half-German, dated a girl who was half white and half Hispanic. He said that it was a positive experience for him as both their parents were agreeable and supportive.

Laura Peckham is currently in a relationship with Jesus Reynoso. She is white and he is Mexican. They’ve been together over a month and the only problem they have, she says, is that, “his parents only speak Spanish and I wish I could talk to them.”

Currently Peckham is trying to learn Spanish, amusing his family and charming Reynoso as well. Peckham believes that their cultural differences do not phase them at all.

Perhaps the concern of interracial dating has been given more attention than it deserves. While our society tries to overcome racism, we too often focus on differences in cultures, allowing them to become obstacles instead of challenges.

So until we can stop giving double-takes of couples of different races, or bi-racial children, we have a lot to work on when it comes to overcoming differences and learning to have positive experiences for him as accept others who are different than we are.

Expressing the status of King’s dream

By Janna Preston
Asst. Multi-Cultural Editor

Americans all over the nation will observe this day of tribute to Martin Luther King, Jr. on January 20th, for all of his contributions to civil rights. This great and powerful leader helped fight against such issues as poverty, racism, war, and violence. Although these same elements still continue to affect societies all across the world today, King was significant in that he helped America leap ahead in its tolerance of equality among all races and classes of people.

But is King’s dream realistic or just merely what it connotes, a dream. With so many different races, religions, regions, subcultures, we will all always be separated by something.

King gave all people a very clear message “to either nonviolence or nonexistence,” which holds a potent meaning for today, since because of our war with countries like Iraq and possibly North Korea.

Tolerance has been a factor that has been encouraged by people to learn to accept others of different races and religions. Tolerance has been delivered since then but maybe not to the extreme of King’s speech expressed forty years ago, he delivered his famous “I have a Dream” speech to over 200,000 civil-rights marchers at the Lincoln Memorial in Washington, D.C.

From that speech, his words “sang” to Americans, captivating and motivating them as a nation to progress rather than to regress. His words are not less familiar today as they were then.

We are still reminded as children and adults that, according to King, “When we let freedom ring, when we let it ring from every village and every hamlet, from every state and every city, we will be able to speed up that day when all of God’s children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing in the words of the old Negro spiritual, Free at last! free at last! thank God Almighty, we are free at last!”

35 years have gone by since the assassination of King, and within that time, has his work continued to help shape civil rights in America? If King was alive today, would he be satisfied?

Would he feel his dream has been achieved?

“No,” says student Sarah Lynch. “Although it is better than it used to be, I don’t know if it will ever be achieved. It’s something people would like to see happen but there are so many cultures, races and religions that separate us all.

And the truth is, we all think we’re doing things the right way.”

Staff member Henry Coursenbus believes we still have a long way to go before we can make King’s vision a reality. “I think we’ve made progress and will achieve it but we’re far from it. I’ll take a few generations.”

King obviously made an impact on America and has inspired millions of people with his hypnotic speeches that still inspire us today. King will continue to live on and in commemorating this great

Noontime Bands: Same Way Again rocks Student Union

By Ivan Fernandez
Staff Writer

CSUSB's promotional event, Noontime Bands, which promotes local music groups, kicked off with a bang when Emo-rock group Same Way Again performed inside the Student Union Coyote Lounge on Wednesday, January 15. Same Way Again's energetic set attracted numerous students who packed into the Lounge area and beyond, creating a fire hazard any building manager would flip over.

Before the show, I sat down with Same Way Again drummer Daniel Frost, who is also a CSUSB student, to talk about the band and the perks and perils of the indie rock star life.

C.C.: How did Same Way Again come about?
D.F.: Same Way Again had been around for six months when they released a demo called "Almost Famous." They kicked out their drummer soon after and asked me to join, and I accepted with them for about a year and three months now.

C.C.: How long have you been playing drums?
D.F.: I've been playing drums for seven years now but I played violin from the age of four to age thirteen. Then I played guitar and bass and picked up drums at age sixteen.

C.C.: What's it like juggling school and a band?
D.F.: I sleep in my car most days and I'm always working. I'm always on the internet talking to people, promoting the band and I have had to sacrifice a lot of personal relationships just to make it where I am today.

Where Dan and his band mates, singer/guitarist Danny Olivas, lead guitar/backup vocalist John Benner and bassist/screamer Bobby Lamiel, are today is a pretty comfortable place.

Halfway through the set, I look behind me and notice the mass of students packed into the Student Union, nodding away in a synchronous motion to the music. The crowd loved every bit of Same Way Again and new fans like Alfred Rice can't wait to see them in concert again.

"Hopefully next time they'll have a few more songs," says Alfred. Same Way Again will play at The Chameleon in West Covina on Feb. 9 and a show at Ruffy's at CSUSB on Feb. 25. A California summer tour is in the works along with a new EP. The band's official site is www.mp3.com/samewayagain.

Running away from reality

By Alan Francis Vacks Jr.
Staff Writer

The Robert V. Fullerton Art Museum is presenting an exhibit of Kent Anderson Butler's "REFLEXION." Butler displays various digital prints and an interactive installation focusing on one's reactions during a dream state of mind and body. The purpose of the artist's work is "self-examination of my soul." He incorporates multimedia elements to aid in his creation of art including the contrast of light and dark photographs, sound and live video feed.

Butler said he called the exhibit "REFLEXION" because of his personal space. "I analyze how our dreams are a reflection of who we are and a reflection of the people we come into contact with on a daily basis."

One piece titled "Charlene" illustrates a female subject who has her arms extended beyond her head, conveying a carefree journey through her dream that appears absent of conflict and representative of a peaceful slumber. Another digital print, "Dave," implies that the subject is just beginning to descend into deep sleep as the piece reveals the inverted image of the subject's lower legs and feet with the rest of the body submerged in darkness. This depiction could be hinting that maybe he is running away from his reality to his dream.

The interactive installation involves participation from spectators; one must lie down on a bed and gaze into a monitor suspended approximately 18 inches from the viewer's face. As the viewer stares at a black and white headshot of himself, the faint sounds of individuals revealing their dreams consecutively echoes in the participant's mind. The experience reflects the unpleasantness of seeing oneself listen to someone else's dream and lends insight to how we analyze our own dreams.

The museum is open daily except Sundays and Mondays. However Butler's exhibit runs only through Friday, Jan. 25.

For more information, call (909) 880-7373.

STYX on Dec 18th at Coussoulis
ROCKED! ! ! The band performed
their first live performance of a
grand illusion. What can I say? The show
roasted me. With STYX, the band formed in
Chicago in the early 1970s, with founding
members Dennis D. Young and Tommy Shaw, and
the next two decades, the band sold more than 40 million
albums and toured the globe sever-

eral times. Two of their more sig-
nificant releases were "Grand
Illusion" in 1978 and "Paradise
Theater" in 1980. This album
symbolized and spoke to the
decade of America in the 1970's
and remains my favorite from
them.

In an age of "flash in the
pan", disposable "artist" like The
Spice Girls, Hanson, New Kids,
and others, its nice to see the
good, honest, passionate rock
and roll music. If anyone came to
I'm awaiting his next
film. Definitely Watch This Film.

Book Review: Do You Love
Me, or Am I Just Paranoid?

By Jennifer Ward
Staff Writer

Dating, sex and of course - love.
Often times it seems to be nothing
more than a liquid-induced period of
insanity. At least that's how Carina
Chocano, author of "Do You Love
Me, or Am I Just Paranoid? A Serial
Monogamist's Guide To Love"
describes love.

This is no guidebook, nor does she
believe herself to be an expert, it
is simply a realistic view of our
high-strung society and the relationships it
produces. "Do You Love Me..." is a book for
everyone, no matter what state your
love life is in. She is not
afraid to tell it like it is, and she cre-
ates a refreshing outlook, especially
when compared to most stuffy rela-
tionship how-to books. For those
who suffer every time he doesn't
call, and cringe each time you bend
your not-so-typical
Hollywood ending. From watch-
ing the preview, it looked like it
had a bit of action and being that
the only other Latino director that has
got action in his films is
Robert Rodriguez, I was curious
to see if this film would have
good action...and it did. This story
wasn't to the caliber of The
Usual Suspects, but then again, it
was no X's.

Marcos: Did you rain her?

Ivan: A gentlemen never tells. *
cries on the inside * Anyway, I
met them both and I find out
they're promoting Empire. Ivan
talks about what it took to make
the film and how this is his first
big budget film. So naturally, I
got giddy with excitement
because I'm sitting there with a
bunch of big shots and little shots
and I'm totally hyped. But I
gues the point is, maybe I couldn't
bring a fair review of the
film because I may be slightly
biased towards the film. So that
leaves Marcas to review the film
while I get a sandwich. Later.

Marcas: It stinks. Really, it did.
Oh, no, not true. This film had
what I wished other films would
have: your not-so-typical
I'm awaiting his next
film. Definitely Watch This Film.
Orange County Drum & Percussion

By: Heather Hubbard
Staff Writer

Chad Sexton, Adrian Young, Travis Barker, John Wysocki, Erik Sandin. These are just a few of the drummers that come to Southern California to have their drums custom made by the world famous OCDP (Orange County Drum & Percussion). Many Southern Californians do not realize that the most popular custom drum building company is visited by some of the best drummers in the industry is right in Orange County. Not only that, but OCDP actually works one-on-one with the artists on ideas for each kit. Despite the big names that walk through their door, the employees are hardly fazed by their famous clients.

Perhaps that's because they come into contact with so many high-profile musicians. Whatever the reason, it is pretty obvious John Machado and Daniel Jensen, the owners and creators of OCDP know their stuff; they had the idea of opening up a drum shop when they were both working at another company, West Coast Drum, in the early 1980s.

Machado and Jensen were hired by West Coast Drum to help in repairing the company's drum building equipment. Eventually, they decided it was time to open up their own business. When OCDP first opened it was a retail store that offered repairs, custom drum building, and even lessons. However, as the company continued to gain popularity, it became focused solely on building custom made kits. What hasn't changed is the personal service every drummer can expect to receive at the small drum shop. OCDP doesn't own any factories and there are no assembly lines because each kit is made by hand. Yet building custom drums isn't the only thing these guys are known for; they're popular for their vented drums as well. In fact, they created the vented snare. Large vent holes, small vent holes, whatever the drummer's heart desires are cut into the snare. The result? A louder, drier sound with less resonance. "We just wanted to achieve that kind of volume [of a loud beat] and that kind of sensitivity in a smaller drum. [They] were an immediate success. All of our endorsers wanted them. People that weren't our endorsers were even buying them," Machado commented.

Today, OCDP's creations can be found on almost any stage. Travis Barker uses their kits for all three of his bands (Blink, Boxcar and Transplants), Chad Sexton (311) was one of their first big customers after he became bored with the regular, factory made drums. Sexton practically lives at the company he's there so often. These drummers, among the many others that use OCDP, can come up with any wild, unusual idea for a kit and work with the company to turn their idea into reality. Basically, the musician will call or come into the shop, tell Machado their idea. (Machado usually pitches in some of his own ideas as well, such as Adrian's glowing kit on the recent No Doubt tour) and then he'll do a quarter of weeks (obviously the time varies with each kit) the drum set is finished. Then the artist can pick it up or have it flown to wherever the band may be. Sometimes, the requests can be quite, um, unique. "We get a lot of unusual requests," Machado told me. Among them? Kits made of tennis ball felt, strobe lights built into the kit that would go off every time the drums were hit (John Otto from Limp Bizkit (you know how extravagant he is) used them). The lights were so sensitive they began flashing every time someone so much as touched them. They've also made a kit made of red angi­c, he's there so often. Life is sacred. The creation of life is a beautiful thing; it's loss, the most difficult aspect of the human condition to contend with. The terms on which people enter and exit this world have long been open to many types of ethical debates. Science is now on the verge of giving scholars, philosophers, legislators, and the rest of humanity new ethical water to tread in and, as we begin to wade in to the ocean of human cloning, no one knows how far it is to the bottom.

There are two types of human cloning currently being pursued. Reproductive cloning seeks to plant an embryo in a woman's womb and develop it to the full term. The clone would then be born and, ideally, live out a full life as an exact aesthetic double of one it's parents.

Therapeutic cloning involves fertilization in a laboratory setting but terminates the embryo after the cells only begin to multiply, and some have been removed. It is believed that research may prove these cells capable of growing up. The parents would automatically assume that certain personality characteristics should be endowed to the child and comparisons would be almost constant. Being that the personality would not be the same, isn't that an omission of shallowness by people love the personality of a person more than the body it came in. If not, no one is going to be satisfied.

There is also talk amongst supporters about cloning super models, scholars, or star athletes. I would argue that the evolution of our society is heavily rooted in the notion that the personality characteristics should be endowed to the child and comparisons would be almost constant. Being that the personality would not be the same, isn't that an omission of shallowness by people love the personality of a person more than the body it came in? If not, no one is going to be satisfied.

Therapeutic cloning should be supported because it will improve the life of pre-existing, naturally spawned humans with physical detriments, while not actually attempting to play God and recreate life.

Researchers indicate that millions of Americans suffering from different neurological disorders and disabilities may be treated from embryonic cells taken from a clone. Cells could also be taken to repair and grow organs for transplant, ending the organ donor problem that plagues the country.

Fortunately, this will probably never be legally endorsed in this country. Last year, legislation was passed that essentially outlawed research on reproductive cloning. On the flip side, in the same bill, there was a four-year moratorium placed on therapeutic cloning.

Therapeutic cloning should be supported because it will improve the life of pre-existing, naturally spawned humans with physical detriments, while not actually attempting to play God and recreate life.

Researchers indicate that millions of Americans suffering from different neurological disorders and disabilities may be treated from embryonic cells taken from a clone. Cells could also be taken to repair and grow organs for transplant, ending the organ donor problem that plagues the country.

On top of all this, could you imagine the programming on Jerry Springer, in a cloning society? "My clone is having sex with my husband and he doesn't know." And perhaps the most frightening possibility of cloning; five Richard Simmons running around the planet.

Fortunately, this will probably never be legally endorsed in this country. Last year, legislation was passed that essentially outlawed research on reproductive cloning. On the flip side, in the same bill, there was a four-year moratorium placed on therapeutic cloning.

spend primarily on definitions of the theories and concepts. Professor of philosophy Susan Finnen, in response to Dr. Plantinga's first lecture offered that, "After attending his lecture this evening . . . I would . . . add that he is extremely smart and very clear. I don't agree with his conclusions, but he is so clear that it is a pleasure to engage in discussion with him." Finnen has once before met Dr. Plantinga, "What impressed me about him was that he was absolutely kind and humble, even though he is a world famous philosopher. He just seemed to be completely unpretentious and easy to talk with."

The final lecture at CSUSB, held in University Hall, brought a more "formal logic" to the podium, according to Everette Henes a student looking to attend Calvin College, where Dr. Plantinga received his bachelor's degree in 1954. Dr. Plantinga examined propositions and conclusions with the 70 in attendance at his lecture "Can God Break the Law?"

Assistant philosophy professor, Matthew Davidson, was the man responsible for arranging Dr. Plantinga's visit. These arrangements were said to have taken one year to plan. Besides writing his dissertation under Dr. Plantinga, Davidson has also, "...edited a collection of his very important papers in the metaphysics of modality Essays in the Metaphysics of Modality." When asked about his opportunity to work under Dr. Plantinga, Davidson comments, "I spent a year at Notre Dame in the Center for Philosophy of Religion."

Davidson adds, "He was wonder­ful to work with. He not only is one of the best philosophers around today, but he is also one of the warmest, kindest, and Wittiest people I have ever met."

Degree continued

Systems focuses on interdisciplinary studies with an emphasis on application development and system administration. The Computer Science degree also requires 12 more units than the 180 required by Cal State to graduate, whereas the Computer Systems major also only requires the 180 units. Because of this it is also better for those students wishing to have a double major. In order for the department to make the degree available they had to get approval from the Chancellor's office and have some student interest in the subject. This began two and a half years ago because of growing interest among faculty in the department of computer science. In order for the degree to be approved it had to be shown that students had an interest in it. Many students majoring in computer science were surveyed, and half of them said that they would be interested in majoring in computer science if it were offered at Cal State. The program was then prepared for our campus and is now accepting students.

If you have any questions about the Computer Systems degree you can contact Dr. Amato Concepcion, Dr. Richard Bottig, or Professor David Turner in the Computer Science Department, or you can contact the department directly at 880-5326.

Men’s basketball atop CCAA

Wesley Collins
Staff Writer

Coach Larry Reynolds stepped down last year as the head coach of the Cal State San Bernardino Men’s Basketball team to coach Division I Long Beach State. This opened the door for his assistant Jeff Oliver to grab the reins and guide the team to the Promised Land.

"Coach Reynolds was my mentor... I have a lot of respect for him," says Coach Oliver. "Yet Oliver, who beat Coach Reynolds at Long Beach State in November, does not mentor... I have a lot of respect for him," says Coach Oliver. However, with players like Reynolds at Long Beach State for him.

West Region Champions.

Coach Oliver. "He did all the hard work," he says with a chuckle. He put together," says Coach Oliver. Oliver. "He did all the hard work," he says with a chuckle. He put together," says Coach Oliver. After losing their first four regular season games by a combined seventeen points the team has rolled off seven straight victories.

The team is currently 5-1 in division play and sitting in first place.

"Our goals here have always been to compete for a conference championship, get into regional play and then see what you can do," says Coach Oliver. "There's a lot of people that are doubting us right now," says senior Bobby Burries. However, no one on the team doubts that when all is said and done they will earn their fourth consecutive CCAA Championship this year and compete for a second straight West Region title.

STRAIGHT SHOOTING: Levy and company hope to outshoot and outplay the CCAA conference.

Our goals here have always been to compete for a conference championship, get into regional play and then see what you can do," says Coach Oliver. "There's a lot of people that are doubting us right now," says senior Bobby Burries. Three Cal State Women's Volleyball players earn regional and national recognition as their coach is named regional Coach of the Year.

Junior outside hitter Kim Ford was selected as the California Collegiate Athletic Association women's volleyball player of the year by a vote of the conference's 12 coaches. Joining Ford on the All-CCAA first team were junior middle blocker Kim Morohunfola. As freshman setter Cristen Trent earned second team honors.

Coach Kim Cherniss was named the CCAA Coach of the Year for the second straight year for leading the Coyotes to their second straight CCAA championship.

Both Ford and Morohunfola were voted to the American Volleyball Coaches Association All-Pacific Region first team for 2002.

Ford, a 2001 All-American, finished the 30-match schedule as the CCAA leader in kills per game (4.70) and ranked fifth in digs per game (3.61). She also served up 30 aces and had 70 blocks in 106 games.

Morohunfola, also a 2001 All-American, led the Coyotes with 1.29 blocks per game and averaged 3.38 kills per game, while serving up 29 aces.

Trent averaged 11.36 assists per game, 1.90 digs per game and .52 blocks per game along with serving up 34 aces.

The soccer field played host to several athletes which where honored for their performances.

Johnny Richardson was named to the All-California Collegiate Athletic Association first team after a stellar performance since this season. The junior forward from Upland and Cal Baptist University, led the men's soccer team in scoring this past season with 27 points on 11 goals and five assists.

Sophomores Jason Koza and Barry Steele were elected to the All-CCAA second team. Koza, from La Serra High in Whittier, was the team's second leading scorer with 21 points on 7 goals and 7 assists.

On the women's field Kayla Humphries, a junior forward was placed on the All-CCAA first team. Junior midfielder Natasha Araujo was named to the All-CCAA second team.

Two sophomores - Amber Cappello and Michelle Lopez — earned honorable mention.

With a host of players returning in 2003, CSUSB looks to take the CCAA by storm.

A LITTLE BREATHER: After an injury plagued 2002 season this year's 'Yotes have come together and are playing great defense, holding CCAA opponents to 53 points a game. The Coyotes are also looking to move up in the standings of the CCAA and use their tenacious defense to stop their offensive-minded opponents.

No Winter Break for Women's Basketball

Levy relieves pressure for Coyotes

CSUSB Men's Basketball standout forward Jonathan Levy was named California Collegiate Athletic Association player of the week. His domination in the previous two games where the factors that led to his nomination.

"I was excited about it because it was my first one of my junior year," says Levy.

Levy is a transfer student from neighboring Cal State L.A. He felt that coming to CSUSB was the right choice to better his future.

"I'm just happy to be able to contribute toward the team this year," says a humble Levy, who in two blowout wins against division foes UC Davis and Chico State, averaged 24.5 points and eight rebounds a game.

Levy is just happy to be a member of the CSUSB basketball team this year.

"More guys have stepped up and made more plays..." says Levy about the competition between his CSUSB team and his old CSULA team. "It's more of a team effort in every game," adds Levy.

"Congratulations. I'm proud of him, they finally gave it to someone on our team," says teammate Jessica Jones.

Levy adds a third scoring threat to the potent CSUSB offense. He helps senior Bobby Burries and Lance Ray get more open looks and relieves them of some of their scoring duties.

Despite early losses to No.3 ranked Tarleton State and No. 8 ranked South Dakota, the coyotes have won seven straight games. The team currently has a 7-4 record and is 5-1 in CCAA play, which is good for first place.

"We're getting better everyday," says Levy who has scored in double figures eight times this year.

With the help of Levy this year's team is on pace to win a fourth straight CCAA title and get into the West Region Tournament.

A Trio of Stars

Kameleha Bell:
The most consistent 'Yote. She is the leading scorer (14.5 ppg) and rebounder (9.5 rpg).

Leilani Tirona:
Second leading scorer on team with 10 ppg and other only player averaging double figures.

Hannah Low:
She is a force on the block and is averaging 8.2 rebounds per game.

CCAA Home Games

SAN FRANCISCO STATE
(Jan 24): At the moment, SFSU is 2-4 and probably looking to surprise the 'Yotes with a win at CSUSB.

SONOMA STATE UNIV.
(Jan 25): Jessica Jones heads the SSU attack and is the ninth leading scorer in the CCAA. SSU is currently in third place and looking to move up in the rankings by defeating CSUSB.

CAL STATE STANISLAUS
(Jan 31): CSUS is sitting pretty in second place and is led by Shannon Donnelly the fourth leading scorer in the CCAA.

CAL STATE BAKERSFIELD
(Feb 1): Currently, CSUB is in sole possession of first place and is looking to take the CCAA by storm and take a league title. Not mention they have the leading scorer in the CCAA.
