Appointments Available
For Reading Machine Demo

Anyone interested in seeing how the Kurzweil Reading Machine works is invited to schedule an appointment with Dr. Theron Pace (Services to Students with Disabilities), Ext. 7226. Dr. Pace recently attended a two-day training session in Cambridge, MA, on the machine, which converts printed material into English speech for the visually impaired. Located in the Learning Center, PL 37, the machine was donated last fall by the Xerox Corp.

A broad range of functions is available to users, who can command the machine to speed up or slow down the reading rate, adjust the tone, repeat lines or words, spell words which may be obscure, announce punctuation and capitalization, and mark certain words or phrases for later reference. The machine replaces a reliance on human readers and allows immediate access to printed materials. It also saves time, as it has the capacity to read faster than human speech.
