San Bernardino artist Kat Grossman and Fontana police chief Sam Scott are this year's Distinguished Alumni at Cal State.

A resident of San Bernardino since 1970, Grossman has exhibited "integrity, intelligence and a strong sense of fairness," says Beverly Hendricks, dean of CSUSB's School of Humanities and the one who nominated Grossman for the award.

The 1983 graduate received her bachelor's degree in art and soon became a founding member of the university's Friends of the Gallery, serving as president of them, "says Twillea Carthen, human resources specialist.

The big news of the meeting came during Twillea Carthen's speech. "ADA and Assistive Device Program Update informs faculty and staff of a policy change regarding how faculty and staff with special needs obtain assistive devices. This process has been decentralized from the Chancellor's Office. Under the new policy, a faculty or staff member must submit a request with a committee, which Carthen is the chief member.

This application is reviewed and the final decision is made.

This new method is much faster than the old one. The committee meets on campus. The money for the devices is here. Before the change the money for all the Cal State campuses was divided among the campuses and then distributed to each accepted request. It was time consuming and hard to keep track of progress. With the new system all the work is handled in-house and more requests get funded. It is also easier to check the progress of an individual request.

The workshop opened with a welcome by President Evans. Susan Cooper, director (Academic Computing and Media), and Chan Beeman, self-instructional lab manager talked about Assistive Technology Awareness.

Students demonstrated some assistive devices, including Zoom Text, which magnifies images and text on a computer screen up to 400 times for persons with visual impairments.

Issues concerning evacuation preparedness for persons with a disability were then addressed by Kamille Tortes, dispatcher (Public Safety). She discussed evacuation of disabled persons from buildings and from the campus itself.

Handouts also were given on emergency preparedness and emergency sign language.

J.C. Robinson, associate vice president (Academic Personnel), then talked about the rights of faculty and students with a disability. He affirmed the Human Resources Department's commitment to Americans with Disabilities Act (ADA).

ADA, passed in July of 1990, is an anti-discrimination law. It ensures that people with a physical or mental disability can be fully integrated into every aspect of life, including employment, public and private services, transportation, public accommodations and telecommunications.

McErickson and the staff of Services to Students with Disabilities spoke about the services offered by the SSD office. His office, along with Human Resources sponsored the workshop.

INVESTMENT, REAL ESTATE, INSURANCE LEADERS JOIN CSUSB ADVISORY BOARDS

Mitchum-MacIntosh are the latest appointments to the University Advisory Boards for the CVC and main campus.

Seymour brings to the post more than 25 years of financial and public accounting experience, including his current post at A.G. Edwards & Sons. Rutherford, who oversees his own firm in Palm Desert, Las Vegas and Tucson, has had a distinguished career as an investment manager, commercial real estate broker and business person for 26 years. They are appointed by President Evans to the CVC advisory board and will consult on the growth and development of the satellite campus over the next four years.

Mitchum-MacIntosh, a 1982 alumnus of CSUSB, is an employee benefits counselor for the Inland counties clients of Johnson and Higgins. She is a chartered property and casualty underwriter and joins the University Advisory Board for the main campus.

Kathleen Mitchum-McIntosh

Palm Desert investment broker Dan Seymour and real estate broker Ted Rutherford along with Orange County-based property/casualty broker Kathleen Mitchum-MacIntosh are the latest appointments to the University Advisory Boards for the CVC and main campus.

Seymour brings to the post more than 25 years of financial and public accounting experience, including his current post at A.G. Edwards & Sons. Rutherford, who oversees his own firm in Palm Desert, Las Vegas and Tucson, has had a distinguished career as an investment manager, commercial real estate broker and business person for 26 years. Have you noticed the changes in parking services lately? Three new parking ticket dispensers, increased customer service, the high visibility of parking officers?

All of the changes are part of the new parking policy approved this past September.

As of July 1 free parking at Cal State becomes more readily available. Notice board faculty, and staff will need to buy parking tickets for special events, such as plays, concerts and guest speakers. Saturday decal parking, for example, will be harder to duplicate, with new decals, been added as well as an escort service.

Though rigorous enforcement of the new policy begins July 1, the parking services continues to make changes in the policy for awhile.

Due to increased overhead costs, the new policy will be harder to duplicate, as well as adding new decals.

Beginning in July policy handbooks also will be distributed.

With the policy parking services has increased customer service and opened the information booth on Saturdays. Also, the high officer-visibility in the parking lots makes officers easier to find and has helped reduce the percentage of vehicle burglaries and car thefts. New decals, which will be harder to duplicate, are being made, and bicycle officers have been added as well as an escort service.

"I feel that this new policy is equitable because, in the past, some groups had to pay, and others didn't," with the new policy everyone pays and not one group is singled out.

The policy also includes a five-year construction project which will create a safer and improved campus environment. "Hopefully we can make our students feel safe in parking lots," he says.

"I am excited about the policy because, for the first time, we've developed a five-year parking program," Says Moses. "This year's money will be used for the widening of Coyote Road narrow (continued on back)
Programmed Cell Death as a Mechanism of Teratogenesis

Nicole Bournias (Biology)

Studies have continued utilizing Drosophila melanogaster as a model organism to investigate elucidate potential mechanisms involved in teratogenesis (causes of birth defects). Current studies underway involve investigating the possible link between altered patterns of programmed cell death and teratogenesis. It is already known that one of the mechanisms involved in normal development is the orderly programmed pattern of cell death. Certain cells are instructed to die so that morphogenesis can take place (think of how digits are formed or how a tadpole loses its tail). It has recently been proposed that any outside perturbation of this orderly pattern would result in abnormal development (such as fused digits). My focus has been to use Drosophila embryos to investigate the possibility that teratogenesis (drugs that cause birth defects) alter such programmed cell death patterns. Currently there is an undergraduate student, Hannah Toth, who is working on this project. She also has received ASI research funds to carry out her research project.
More Faculty Books “Launched”

Nine faculty were honored on Wednesday, May 22 at 3 p.m. in the Sycamore Room for recent book publications. President Evans greeted the authors and complemented the faculty as a whole on a productive year. In total, 36 faculty published books during the 1995-96 academic year. These books are on view in the President’s display case in the Administration building.

Left to right—Diane Halpem (Psychology), Ed Teyber (Psychology), Billie Blair (Education), Patricia Tef-Coulon (Education), Marilyn Mitchell (Criminal Justice), Frank Williams (Criminal Justice), Jill Burrier (Philosophy) and Fred Jenndt (Communication Studies).

Led a field trip along the Garlock fault for the South Coast Geological Society, September 23-24, 1996.

Health Sciences

Thomas Timmreck Professional presentation, "Planning and Program Development for Aging and Health Services: 10 Prowen Steps," at the national annual meeting of the American Society on Aging, Anaheim, CA, March 18, 1996.

Social & Behavioral Sciences

Anthropology

Frankie Barrand & Pete Robertshaw Organized a conference on "The Archaeology of Complex Societies" held here on campus, October 20-22. The conference attracted nearly 100 registrants, mostly from California and the Southwest, some came from all over the world. (The organizers thank the Foundation for its support of this event.)

Criminal Justice

David Ditchor Participated in a panel discussion on "The Future of Three Strikes and You're Out" law at the annual meeting of the Academy of Criminal Justice Sciences, Las Vegas, NV, March, 1996.

Frank Williams Elected as the chair of the Section on Corrections for the Academy of Criminal Justice Sciences.

Participated in a panel discussion on "Perspectives on Critical Criminology" at the Academy of Criminal Justice Sciences, Las Vegas, NV, March 15-16, 1996.

Elected Chair of the Section on Corrections of the Academy of Criminal Justice Sciences, March, 1996.

Participated in a panel discussion on "An Examination of Drug Policy" at the Western Society of Criminal Justice Meeting, Reno, NV, Feb 21-23, 1996.

Economics

Nancy Rose Was on the Jack Cole radio talk show, WJNO from North Palm Beach, FL, discussing Michael Tanneker of the Cato Institute on December 14. She also was interviewed locally, by Richard Lee, of KFGR and KOOU, regarding her views on the economy.

History

Elliott Barkan Elected to a three-year term on the Executive Board of the Immigration History Society (a national association), and lectured on race and immigration issues in Norway, April 20-26, 1996.

Conducted an advanced placement workshop sponsored by the College Board on "European History," Honolulu, HI, February 8-11, 1996.

Appointed to Advisory Board of Discovering U.S. History CD-ROM for Gale Research, Inc.

Appointed to the national advisory board for The History Teacher (the journal of the Society for History Education).

Political Science

Sociology

Eliza Varela Was featured on a CNBC segment—aiong with Congressman Brian Bilbray (San Diego) and Ed Gomez (UC Berkeley graduate)—about the "Religion of the Day," May 1995.

ABSTRACTS OF RESEARCH IN PROGRESS

"On the Reproducibility of Column Performance in Liquid Chromatography and the Role of the Packing Density" by Brent J. Stanley (Chemistry), Charles R. Foster (senior CSUSB chemistry major), & Georges Guiochon

The packing behavior of typical 10 micron C-18 stationary phases for liquid chromatography is being studied. The column efficiency, void volume and column packing density as being assessed as a function of packing conditions. The statistical significance of the results is stressed. Evidence for the degree of packing homogeneity and consolidation within the columns packed under varied conditions is sought, and comparisons with analogous results from semi-preparative and preparative chromatography columns are studied. Paper in preparation.

"The mind is not a storeroom to be filled but an instrument to be used." John Gardiner
Mo Vaziri
Spent a month and a half last summer working in the Stroke Tracking Room of the Stock Exchange in Paris in study the focus on how alpha particles affect the brain, the IDP (International Invitation of the Institute Superieur D'Etudes Financieres et D'Ingénierie (ISEFI) and the Centre Serveur de l'information Boursiere de France (CEISIF)). Vaziri also evaluated the ISEFI Master's of Business degree program and developed multimedia course presentations for the program, which also included computer presentations through the software program "Power Point." The ISEFI and the CEISIB are planning to present a formal proposal to allow CSU students to study in France during the summer and work in their sophisticated training facilities at the Stock Trading Room and the Exchange in Paris.

Accounting & Finance
David Bellis
Co-founded by the Center for Collaboration for Children, CSU Fullerton, to provide program outcome evaluation training to nine agencies in San Bernardino County. These agencies are the County Department of Public Social Services (DPSS) to provide intervention services to families and youth at risk for domestic violence and alcohol and other drug abuse. Bellis is collaborating on the training with David Berman (Sociology). The goal of Bellis' consultative work is to provide these community-based agencies with systems by which they can measure the impacts/outcomes of their services on the target families and communities.

EDUCATION
Advanced Studies
Dwight Sweeney

Mary Ellen Bopst

Ron Pendleton
Developed three distinctive new sites on the World Wide Web. The first site (http://www.csusb.edu/ين) is for the Gamma Nu Chapter of Epsilon Pi Tau here at CSUSB. Epsilon Pi Tau is an international honorary for professions in technology and has a membership of distinguished individuals from CSUSB and the local community who use technology effectively and creatively. Gamma Nu is the first chapter of Epsilon Pi Tau to have a World Wide Web site. The second site (http://www.csusb.edu/techer) is for the CSUSB Adult Education/Online Teacher Education Programs. This site should be of interest to faculty who are considering the development of web sites as it exemplifies how courses and program information can be made available to students (and potential new students) via the World Wide Web.

In Implementation" to the Association of California School Administrators' Annual Conference of Special Education & Pupil Services, January 12, 1996.

HUMANITIES
Communication Studies
Frew Jenett
Moderator and speaker, "Online Recruitment," at the Association of Human Resources Systems Professionals, mid-Atlantic quarterly meeting, Newark, DE, October 18, 1995.

Meryl Perlson
Presented "Gender Issues in the Changing Production Environment" at the 41st Annual Broadcast Education Association Conference, Las Vegas, NV, April 13, 1996. Invited to join the national advisory board of the Universal Film/Video Foundation.

Theatre Arts
Kathryn Errin
Joined the national board of the New Federal Theatre. Located in New York City, the New Federal Theatre sponsors innovative touring programs, new plays and significant revival. One of New York's most important black theaters, New Federal just celebrated its 25th anniversary. Talented artists open new Federal, including Ron Miller, Ed Bullins, David Henry Hwang, Ntozake Shange, among others. Errin will serve on the education committee.

THROUGH PERSONNEL

Public Safety and Parking staff on their toes as they responded to reports of damage and injuries on the Cal State campus. Information relayed by walkie-talkies among campus personnel prompted building inspections and activities, that would be typical in the utilities assessments, among other things. Kraus (Public Safety), who heads the EOC were conducting a"field exercise" went so well that officials asked to be involved in future exercises.

Meanwhile, faculty and administrators who staff the EOC were conducting a "table-top" exercise in which they were asked to indicate what their first response would be under the same conditions. Kraus reports that the "field exercise" went so will that officials monitoring the drill off campus have asked to be involved in future exercises.

CUSTOMER SERVICE PROGRAM LAUNCHED

A group of 15 employees from the Administration and Finance and Student Services divisions recently completed three customer service "pilot" workshops. These workshops used Connections, a customer service training package that specifically applies to the needs of colleges and universities. The participants learned how to provide quality customer service to Cal State customers.

The workshops provided an opportunity to give their opinions regarding how the training program could be altered to fit CSUSB's specific needs. This feedback will be used to shape the workshop for fall 1996, when it will be on campus.

PARKING...

(continued from front)

road by dorms) and a signal will be put up there. Also, more directional signs will be placed in each parking lot, as well as trash cans placed in the parking lot," he said.

The loss will go under construction this summer and approximately 1,000 new spaces will be added. Where will parking services get the money to pay for the construction? This is where the new policy comes into focus.

"The loss needs repair," says Moses. "That is what this money (from parking fees) is going toward." He adds that "all parking funds collected are mandated by law for construction projects, maintenance, and operation of parking services." Money received from citation fines will go toward alternative modes of transportation for the students, faculty, and staff.

COMMUNITY SERVICE

Frances Berdan (Anthropology) spoke to the American Association of University Women in Corona on "Ancient Mexican Textiles" on April 24. On April 25 she spoke at Riverside Community College on "Aztec Mythology."

Cynthia Pringle (Public Affairs) spoke on April 18 to two classes at Ramona High School in Riverside on careers in public relations. She also was a presenter at the AVID conference held at CSUSB where she talked about careers in public relations to prospective college students.

On April 26, Lynn Diaz-Rico (Elementary/Bilingual Education) spoke to students in the AVID program at Ramona High School in Riverside about "Surviving in the Information Age."

On April 18, Bob Sensor (Secondary/ Vocational Education) spoke to four classes at Ramona High School in Riverside about education and training for careers in telecommunications.

NO ICE

There will be no electricity or air conditioning on campus Saturday, June 22, from 7 a.m. to 3 p.m. While the main substation on campus is being serviced. Prior to the power outage, all data processing equipment and other miscellaneous equipment may be affected due to the loss of power must be secured. Any questions, call Tony Simpson at Ext. 5166.

WEIGHT WATCHERS AT WORK, TAKE 2

Interested in developing new eating habits that will help you lose and maintain your weight? Want to get in shape for summer? Well, the Weight Watchers At Work program can help. In order to continue another successful run here on our campus, weight watchers is signing up a minimum of 16 people for a 10-week session beginning soon. Meetings will be on Tuesdays at lunchtime. But if you want to join and yet cannot attend on Tuesdays, you can join through the on-campus group and attend any Weight Watchers meeting off campus. For more information, call Justin Louisebri at Ext. 5739 or email to jlstoubuyer.

FINAL ROLL CALL...IH BOWI CALL...WHATEVER

In the initial call to all lovers of bowling who have a mind to form a league with fellow employees this summer, the game was described as a game that "hurt less." This assumed, of course, that during a typically safe game of bowling you weren't standing behind the coordinator of this new league, Paul Langford, who has a wicked backswing and once managed to cream the unsuspecting knee of a co-worker. She says it was an accident.

Anyway, she is taking last hour signups for the new CSUSB employee bowling league, which will be held on Tuesday evenings at 6 p.m. starting (probably) in late June. The cost will be around $8, you can rent shoes for about $2, the bowling balls are provided by the lanes, but bring your own knee pad.

CUSTOMER SERVICE

Congratulations to Tom Rovolo (Extended Education) and his wife, Jeannine, on the birth of their second child, Nicholas. Born Sunday, May 26 at 2:44 p.m., Nicholas weighed 8 pounds, 8 ounces and measured 20 inches long. He also was welcomed by his sister, Veronica.

The Lots will go under construction this summer, when it will be on campus.
